### PROFILE

Detail-oriented and dedicated QA Engineer with a strong focus on ensuring software quality through comprehensive manual testing. Experienced in identifying and reporting bugs, ensuring functionality, and enhancing user experience across web and mobile applications. Adept at working in agile environments, collaborating with development teams, and maintaining detailed documentation to support high-quality software delivery.

### WORK EXPERIENCE

#### Dev Decorators (1 year experience) 2025

##### QA Engineer

- Conduct manual testing on multiple projects for web.
- Perform UI/UX, functional, and responsive testing to ensure seamless user experience.
- Execute regression and sanity testing before product releases.
- Log and track bugs using Jira and other reporting channels.
- Participate in sprint planning and ensure timely issue resolution.
- Write and maintain detailed test cases to improve test coverage.

#### QA Intern | Dev Decorators (3 Months Internship)

- Assisted in manual testing of web and mobile applications.
- Reported UI/functional issues and participated in daily standups.
- Gained hands-on experience with Jira, test case writing, and bug prioritization.

#### Certification

[SQA-Engineering Certificate] – [From code sekho]
